New Introductions

GARNET®

Early Sunhigh Variety

DAROGA RED®

Late Ripening Twin of Red Haven

TO OUR MANY FRIENDS, A MESSAGE FROM

Peter Van Well,

President, Van Well Nursery

Dear Friends:

During the past few years there have been many new developments in the business of fruit growing. As nurserymen who specialize in serving the orchardist, we have been vitally interested in new varieties in order to have the newest and best trees available for our customers at all times.

Our RED KING, Braun's Delicious appears to be the earliest coloring apple of all the new super Red Delicious sports. We recommend it for planting where very early color is the prime consideration.

Now we are introducing a new spur type Red Delicious. We call this apple Wellspur (Azwell Strain). It is the newest and latest of the young-bearing, fruit spur type trees. Many horticulturists and orchardists tell us it is far superior to other spur-type strains. It is a smaller tree than the regular standard delicious tree, and produces solid-red fruit.

If you would like more information about either of these excellent new super Red Delicious apples, please write to me personally.

Thank you again for your wonderful patronage.

Sincerely yours,

Peter Van Well

Peter Van Well, President

SEE CENTER PAGES OF THIS CATALOG

Barkley Red Rome is a new and different Red Rome. It is a mutation of Rome Beauty discovered by George L. Barkley in his orchard at Manson, Washington.

Mr. Barkley has producing trees of the second generation, and the Rome Beauty tree with its original sport limb is growing and producing in his orchard. In addition to these trees of the second generation Mr. Barkley has 23 trees of the third generation. These trees produced a total crop of 548 packed boxes of fruit. The inspection certificate issued jointly by the USDA and the Washington State Department of Agriculture on the packout of this crop shows that the apples were "mostly 90% to 100% good red." Trees of both the second and third generation continue to show the same characteristics of better colored and larger fruit that make the original sport limb so outstanding.

The fruit of Barkley Red Rome has consistently shown better color and size than other Red Rome in the Barkley orchard, and other orchards in the same area. Storage tests have indicated that this new apple has exceptional keeping qualities. The apple starts coloring with a stripe and gradually fills in until it colors fully, the stripes remaining prominent even when the fruit has attained full color. The shape of Barkley Red Rome tends to be longer than Rome Beauty or other Red Romes. Tree structure and ability to bear are very similar to Rome Beauty.

RED KING[®] the

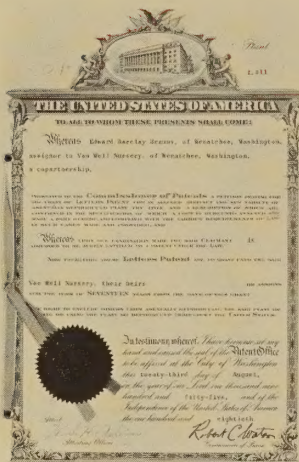

Trade Mark Registered U.S. Patent Office

BRAUN'S VARIETY DELICIOUS

Plant Patent No. 1411

Champion of the New Red Delicious Sports

Sold Only By
VAN WELL NURSERY

WONDERFUL EARLY COLOR

Reports from all over the country again tell us that RED KING* Brauns Delicious is unexcelled in its ability to color earlier than other strains of Red Delicious. Red Kings early, finished color has eliminated color picking.

EXCELLENT KEEPER

Storage tests show that RED KING* Brauns Delicious is a very superior keeper. Apples of this wonderful new variety have been held in storage until late May with no break-down.

SUPERIOR FLAVOR

The old fashioned flavor of Common Delicious has been inherited by RED KING* Brauns Delicious. Sweet and juicy, crisp and mild, this is an apple that is truly delicious.

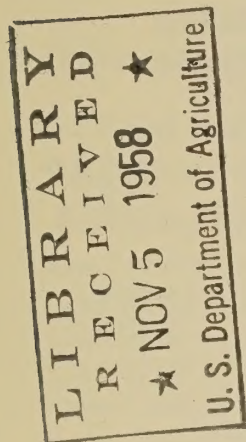

PROVEN THROUGH FOUR GENERATIONS

RED KING* Brauns Delicious of second, third and fourth generations are now producing in most fruit growing areas of the United States and many foreign countries. The beautiful early-coloring fruits continue to show the same remarkable color characteristics found on the original sport limb.

The original limb is located on the low side of a Starking variety tree in the Barker Orchard at Riverside, Washington, and after fifteen years is still producing apples which color at least two weeks ahead of the other fruit on the same tree.

Now known as "the PROVEN new Red Delicious," RED KING* Brauns Delicious is without a doubt the champion of all the new super sports.

Our Yellow Delicious trees are propagated from one of the finest and most productive orchards in the North Central Washington area. This variety is well known as a fast and heavy bearer. It produces large golden fruit and has an exceptional flavor.

Yellow Delicious is rapidly becoming one of the most important commercial varieties. The tree is vigorous and productive. Widely adaptable, it will grow well in almost every part of the country. It is an excellent pollenizer.

Also available on Dwarf and Semi-Dwarf rootstocks. See center pages of this catalog.

✓ VAN WELL RED WINESAP

Originated in the orchard of Al Ruble in East Wenatchee, it is a fine quality apple much improved over the old red winesap. Colors with a stripe to a beautiful dark red. The fruit has exceptionally good keeping qualities. It is a prolific bearer, producing large size apples. Many fruit growers tell us that this is the best of all Red Winesaps. Introduced and sold only by Van Well Nursery. Also available on fast bearing Dwarf and Semi-Dwarf trees. See the center pages of this catalog.

VALnur Double Red Jonathan is a mutation of Jonathan. The fruit starts coloring with a stripe and fills in until the entire apple is completely covered with a beautiful deep red. Earlier and better colored than its parents, but it still has the typical Jonathan flavor and quality.

Introduced and sold by Van Well Nursery.

Also available in Dwarf and Semi-Dwarf trees—see pages 12 and 13 of this catalog.

Van Well's Quality Apple Trees

Our quality apple trees are grown in the heart of the Wenatchee Valley, one of the most famous apple producing areas of the world. We are able to select our strains from the finest trees in the area which have long records of high production and quality fruit. Our trees are grown in virgin soil, a light fertile loam which produces exceptionally good roots.

These factors and our years of experience and know-how combined with the most modern production methods enable us to furnish our customers with the finest trees available anywhere.

SUMMER APPLES

- **EARLY McINTOSH**—Large fruit, crimson color, juicy white flesh.
- **CRIMSON BEAUTY**—Very early with brilliant red color. Ideal summer apples.
- **LODI**—Improved Yellow Transparent, yellow color.
- **RED JUNE**—Good quality, summer apple, red color.
- **YELLOW TRANSPARENT**—Crisp white flesh, excellent for pies and apple sauce.
- **JEFFRIES**—Crimson color, rich flavor, ideal for home orchard.
- **RED DUCHESS**—Crisp and juicy, old favorite cooking apple, red stripes.

CRAB APPLES

For Prices See Standard Variety

- **HYSLOP**—Large, dark red or purplish, good keeper.
- **TRANSCENDENT**—Large, red and yellow striped—good eating and cooking.

WINTER APPLES

JONATHAN—See VALnur Double Red Jonathan on preceding page.

WINTER BANANA—Excellent cooking with red blushed yellow color. Hardy tree, excellent pollinizer.

RED KING® BRAUNS VARIETY DELICIOUS (Plant Patent No. 1411)—See complete description and prices on pages 4 and 5.

RED DELICIOUS—Often called Double Red Delicious, large striped dark red apple.

SPITZENBERG—Red skin, yellow flesh, a good dessert apple.

RED ROME—See Barkley Red Rome on page 3.

RED WINESAP—See Van Well Red Winesap on page 6.

WINESAP (Common Winesap)—Good keeper and shipper, a heavy bearer. Our strain is selected from trees that tend to produce longer shaped fruit.

YELLOW DELICIOUS—See page 6.

YELLOW NEWTOWN (Newtown Pippen)—Excellent cooking apple, light yellow color.

HARDY APPLE UNDERSTOCK

Due to the recent demand of growers in northern areas for hardy freeze-resistant understocks, we are now growing several varieties. The varieties listed below are the ones that showed least damage in the disastrous freeze which struck the Pacific Northwest in November, 1955.

By planting these hardy trees and budding or grafting into the secondary leaders at a later date, the growing of relatively tender commercial varieties should be made possible in areas where winter conditions usually cause serious injury.

HIBERNAL BEACON **EARLY McINTOSH**
YELLOW TRANSPARENT

Special Hardy Combination CANADA BALDWIN on HIBERNAL

Canada Baldwin grafted 12 inches high on Hibernial, this makes a tree with super hardy roots and trunk and a hardy sturdy leader system. We believe that this combination is the answer to many of the hardy-understock problems. When ordering Canada Baldwin on Hibernial trees, please add 10c to prices listed.

Postpaid Prices for HARDY UNDERSTOCK TREES

COMICE

PEARS

Van Well pear trees are grown in light loam soil, and are irrigated by overhead sprinklers. We feel that these conditions enable us to grow pear trees with more uniform and fibrous root systems. Many growers tell us that our pear trees have the finest root systems they have ever seen.

If you are planting pear trees, we suggest that you give us a trial order. We know you will be satisfied.

BARTLETT—One of the leading commercial varieties, an excellent canning pear. The skin is light yellow with a red blush. The large fruit has a smooth and attractive appearance. The tree structure is somewhat upright.

MAX-RED BARTLETT (Plant Patent No. 741)—A red sport of Bartlett with all of the qualities of its parent plus an attractive red color. The flesh is the same color as Bartlett, as the red color does not carry through the skin. This pear has more sugar content than Bartlett, but in most respects is similar to it.

ANJOU—A leading commercial variety in the Pacific Northwest. The fruit is large, round, firm and has very good keeping qualities. The flesh is white, sweet and juicy. The tree structure is large.

FLEMISH BEAUTY—Large, red blush, heavy bearer.

COMICE—Dessert pear, buttery, juicy, sweet.

SECKEL—Sweet, juicy, brown with red cheek.

BOSE—Large, cinnamon russet, long neck. High quality.

FORELLES—Long keeper, fine for table decoration, lasts all winter.

OLD HOME—A hardy and blight resistant tree, principally used for understock.

TILTON

SOMETHING NEW!

Valnur
T. M. Reg.
APRICOT

Very early, highly colored firm fruit which bears heavily. Does not break skins when picking. We believe it is a fine cot for the early market. The tree is very hardy, a cross of Riland and Wenatchee Apricot. Introduced and sold only by Van Well Nursery. Trade-Mark Registered.

EARLY
ITALIAN

PRUNES and PLUMS

PLUMS

- **BEAUTY**—Largest of early plums, oval shape, crimson color, ten days earlier than Santa Rosa.
- **PEACH PLUM**—Light red skin, large round fruit, ideal for home orchard.
- **YELLOW EGG**—Large golden color, juicy fruit, good canner, showy market variety for fruit stands.
- **SANTA ROSA**—Very large round plum, dark red skin, yellow flesh streaked with crimson. As a shipping plum it has few equals.
- **DUARTE**—Large sweet plum with red flesh, sweet and juicy, good quality.
- **WILD PLUM**—Old favorite for jam and plum butter, hardy tree, good bearer.
- **DAMSON**—Small round plum, dark purple skin with yellow flesh, fine canner.
- **PRESIDENT**—Large oblong fruit, dark blue skin with yellow flesh, heavy producer. Good commercial variety.

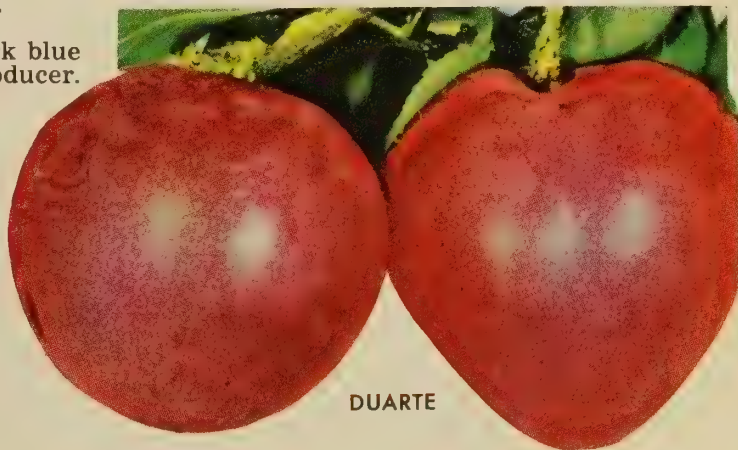

PRUNES

- **SUGAR**—Large and sweet, fine for canning or drying, purple color, oval shape.
- **EARLY ITALIAN** (Richards strain)—Excellent commercial variety, ten days to two weeks earlier than Italian, large purple fruit. A good shipper.
- **EARLY ITALIAN** (Milton strain)—Excellent commercial variety recently discovered in Oregon. Ten days to two weeks earlier than Italian, large purple fruit. A good shipper.
- **HUNGARIAN**—Dark red color, large and sweet, very productive, good keeping qualities.
- **DOUBLE X FRENCH** (Improved Petite)—Larger than Petite, rich and sweet.
- **STANLEY**—Purple skin, golden flesh. Firm, excellent quality. Can be counted on to produce heavy crops every year.
- **ITALIAN**—One of the finest prune varieties. Dark purple color, heavy bearer, good for drying and canning, excellent shipper.

DUARTE

VAN WELL'S QUALITY DWARF TREES

GROWN ON GENUINE EAST MALLING ROOTS

Bear Earlier — Easier to Spray and Harvest

Produce Large Fruit

Our Dwarf and Semi-Dwarf apple trees are grown on genuine East Malling clonal rootstocks. The E.M. IX rootstock produces a true dwarf tree, the E.M. VII rootstock produces a small semi-dwarf, and the E.M. II produces a large semi-dwarf tree. At maturity the trees on dwarf rootstock (E.M. IX) will be from 5 to 9 ft. high, depending on soil conditions. The trees on semi-dwarf rootstock will reach 10 to 15 ft., depending upon soil conditions. As soil conditions will make a difference in the ultimate size of the trees, they should be considered in choosing the proper rootstock.

Dwarf trees should be planted at a distance of 8 to 10 ft. each way. Semi-Dwarfs should be about 15 to 20 ft. each way. When the trees are planted care should be taken to prevent them from being planted too deep, make sure that the graft union with the top-worked variety is at or above ground level. This will prevent scion rooting.

The Van Well Nursery cooperates fully with the inspection program of the Washington State Department of Agriculture in the selection of trees from which seed and scion wood is obtained.

DAROGA RED

T.M. Reg.

**A new peach that is a
late ripening twin of
RED HAVEN**

GOLDEN JUBILEE, F—Early peach with yellow flesh and skin. A good bearer and canner.

DAROGA RED, F—New this year. A sport of July Elberta which is very similar in all respects to Red Haven. A firm, fine textured peach, yellow flesh with highly colored red skin. Ripens about a week later than Red Haven. Sold only by Van Well Nursery. Trade mark registered.

ROCHESTER, F—A good producer in Western Washington. Very hardy, thrifty grower, deep yellow and red color.

FAIRHAVEN, F—A new peach, large size, good quality, sweet and juicy, excellent flavor.

HALE HAVEN, F—A very hardy and thrifty tree, good bearer and shipper. A cross of J. H. Hale and South Haven. Yellow flesh, skin blushed with red, fine flavor.

SLAPPY, F—Fruit is colored a rich yellow. A good bearer with a superior flavor. Favorite home canning peach.

VETERAN, F—Fruit yellow, a very high quality peach for freezing and canning. Bears early, tree is a vigorous grower.

(Continued next page)

Our healthy, vigorous trees are propagated right, grown right, and delivered to you in perfect growing condition.

EARLY ELBERTA

- **LATE CRAWFORD, F**—A vigorous and hardy tree which produces good, large fruit. Good home canner, yellow with red blush.
- **ORANGE CLING, C**—Also known as Miller Cling. Fine canner, flavorful, yellow skin and flesh.
- **INDIAN CLING, C**—Sometimes known as Indian Blood. Deep red colored skin and flesh, large fruit.
- **RIO OSO GEM, F**—Large firm peach. One of the best late varieties. Fruit is tasty, sweet, rich and juicy.
- **OCTOBER KRUMMEL, F**—Very late peach with good flavor. Fruit is large and round. Skin is yellow with deep red blush.

PEACHES—Continued

• **RED GLOBE, F**—A new mid-season peach, attractive, highly blushed, adapted to distant marketing.

• **EARLY ELBERTA, F**—Also known as Improved Elberta. A large golden yellow peach that has excellent quality. Ideal canning fruit with rich sweet flavor. Good shipper. Ripens 8 to 10 days ahead of Elberta.

• **ELBERTA, F**—The peach that sets the standard by which all other varieties are judged. Rich yellow color, self-pollenizing and a pollenizer for other varieties. A superior commercial canning peach, large fruit, fine shipper.

• **J. H. HALE, F**—One of the finest commercial peaches on the market today. Produces large, round, uniform fruit which has golden skin with brilliant red cheek. An excellent shipper.

PLANTING INSTRUCTIONS

Planting instructions are given on tag attached to every box or bale, also on the back of your invoice. Be sure to follow them.

J. H. HALE

ROYAL ANN

CHERRIES

Sweet Cherries

- **BLACK TARTARIAN**—Black cherry, used extensively as a pollinizer.
- **ROYAL ANN**—Yellow with red blush, good canner.
- **DEACON**—Black cherry, slightly smaller than Bing. Excellent pollinizer.
- **VAN**—Recent introduction from Canada. Black cherry, excellent quality. Good pollinizer for Bing and Lambert. Hardy.
- **BING**—Large, black, solid, highest quality, productive. The leading commercial variety of the sweet cherries.
- **BLACK REPUBLICAN**—Medium size, black, good keeper and shipper, good pollinizer.
- **LAMBERT**—Large black commercial cherry. A good shipping variety—hardy and vigorous.

Our cherry trees are propagated from seed and scion sources which have been inspected and approved by the Washington State Department of Agriculture. We cooperate fully with the Washington State Nursery Improvement Program in order to provide the finest in virus-free and true to name stock for our customers. Our trees are regularly inspected both by government inspectors and by our own nurserymen who have many years of practical experience in growing fruit trees. For these reasons you can be sure of the cherry trees you order from Van Well Nursery.

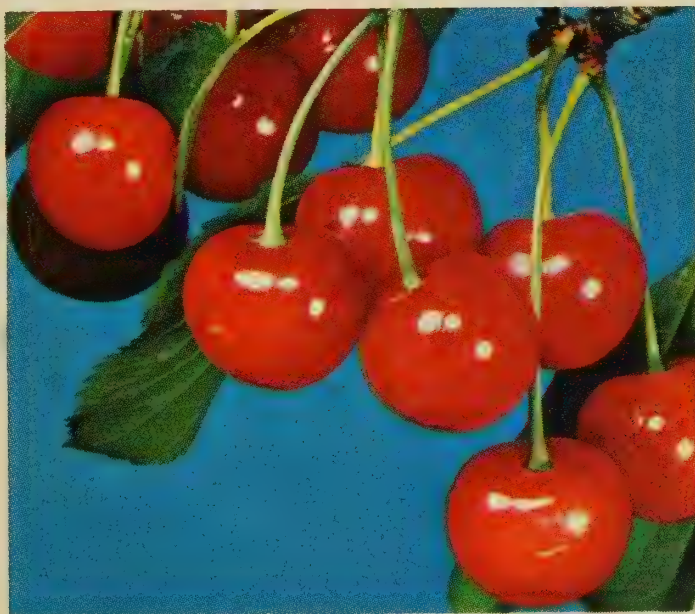

Sour Cherries

- **MONTMORENCY**—Bears young. Fruit clear red with sweet acid flavor. One of the best sour cherries.
- **MAY DUKE**—Hardy, early, ideal for pies.
- **LATE DUKE**—Sour pie cherry, ripens late July. Large dark red fruit.

ORDER BY MAIL

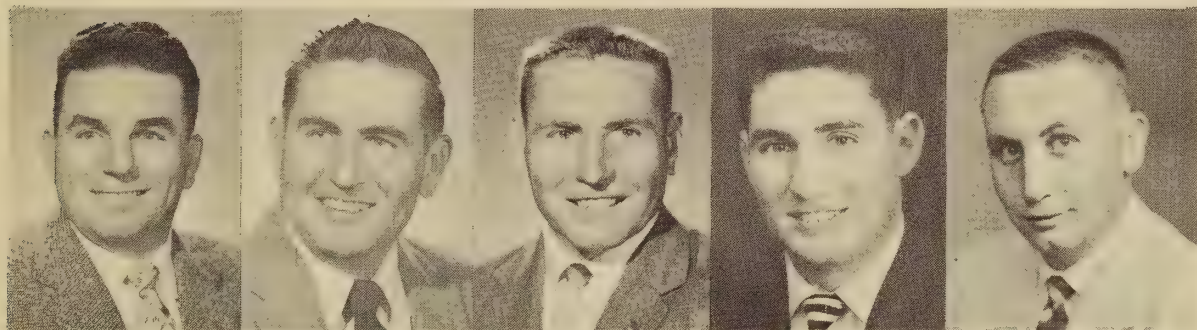

IT'S EASY WITH OUR

POSTPAID PRICES

Yes, it's as simple as A, B, C, to order trees from Van Well Nursery. We pay postage on all non-commercial orders (less than 25 trees). Just fill out the convenient order blank that comes with your catalog and we do the rest.

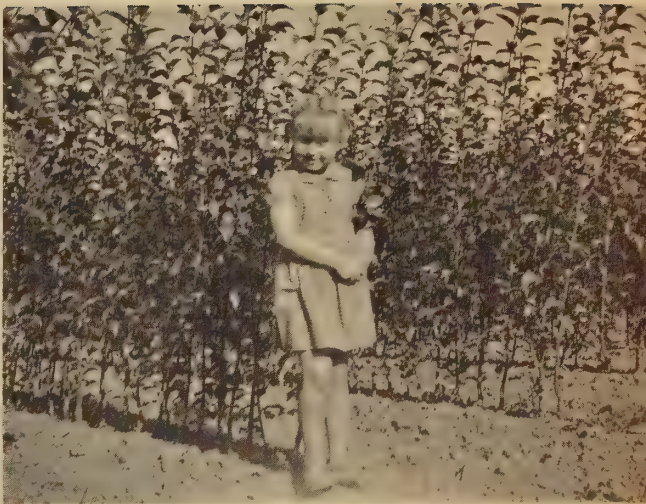

Your order, regardless of size, will receive our personal attention to insure complete satisfaction. We ship only the finest quality stock, **DEPENDABLE** stock from the Pacific Northwest's largest fruit tree nursery.

Residents of State of Washington—Please add 3 1/3% sales tax on non-commercial orders.

Jack Van Well Joseph Van Well Richard G. Van Well Peter Van Well, Jr. Thomas T. Van Well

The thrifty apple trees pictured at right are an example of the quality nursery stock grown in our nurseries. Protected by the towering Cascade Mountains, nourished by fertile top-soil of volcanic ash, given the latest scientific care by expert nurserymen, these trees are the finest money can buy.

Pictured at left is a limb of our Van Well Red Winesap, a large, bright, crimson red fruit which bears heavily. It is an excellent keeper, the first choice of many fruit growers from all parts of the country.

NOTE: COMMERCIAL PRICES ARE QUOTED F.O.B. WENATCHEE, WASHINGTON
except on orders of more than \$10.00 to points within the State of Washington

Please Read Carefully GENERAL INFORMATION

GUARANTEE

We guarantee all nursery stock sold by us to be true to name. If any stock sold by us shall prove untrue to name we will replace free or refund purchase price, at the option of the purchaser.

We guarantee our trees to be in first class, live condition when they leave our packing house. Due to conditions beyond our control, soil, weather, etc., we cannot guarantee growth. We will, however, replace any trees that fail to live, at one-half of the original purchase price. All complaints for failure of trees to grow must be made in writing within six months of the date of delivery.

SALES TAX

Residents of the State of Washington please add 3½% Sales Tax when ordering Nursery Supplies and Non-Commercial Fruit Trees. No tax necessary on Commercial Fruit Trees.

SHIPPING

Our shipping season is from November 15 to June 1. All orders received after June 1 will be held until the following fall.

We pay postage on all Non-Commercial Orders (less than 25 trees) to any point in the United States.

We pay all shipping charges (except Nursery Supplies) on Commercial Orders (over 25 trees) of \$10.00 or more to all points in Washington. Orders to other points in United States and Canada are F.O.B. Wenatchee.

Address all orders and correspondence to:

VAN WELL NURSERY

Box 858 . . . WENATCHEE, WASHINGTON

FRUIT TREE PRICES BASED ON TOTAL QUANTITY

All Fruit Trees in an order take the same quantity price. Example, a total of 25 assorted apple, peach and pear take "25 rate".

MAIL ORDERS FILLED PROMPTLY

These Folks Are Glad They Did!

SPRINGFIELD, OREGON

"I am writing to tell you how pleased we were with the trees you sent us. They are the best trees we have ever planted. The root system was excellent and the trees were sturdy. We couldn't have found better trees if we had picked them out personally."

NEW BUFFALO, MICHIGAN

"Trees arrived in perfect shape—nicest trees I have seen in a long time."

MEDINA, NEW YORK

"... I want to say that all 149 Red King Del. received a year ago are growing beautifully."

CLARKSTON, WASHINGTON

"Received the trees yesterday and thanks a lot. They are the best trees I have ever planted. I am certainly getting some more, if possible, before the end of shipping season this spring."

HENDERSONVILLE, NORTH CAROLINA

"The trees were in good shape. We like them very well... Please send me information about the roots you use, they are the best ones I have ever seen."

FRONT ROYAL, VIRGINIA

"The 25 Red King trees I bought from you arrived and they are, without exception, the most beautiful trees I have ever seen come from a nursery... Good Luck to you, an honest man who provides something really exceptional."
